

When Waiting for *NEW* Equipment is *NOT* an Option

Remanufactured and Reconditioned Electrical Equipment You Can Trust
NEC Compliant & Inspector Approved

The **National Electrical Code** now permits the use of remanufactured/reconditioned electrical apparatus — a major development for electrical system managers.

But it must be done right — by qualified professionals, under nationally recognized standards.

How PEARL Leads the Industry:

- ANSI Accredited Standards Developer
- Certifying qualified companies & technicians
- Enforcing rigorous vetting processes
- Setting the benchmark for safe, compliant reconditioning

Seal of Safety:

Remanufactured/reconditioned electrical equipment can be identified by a PEARL Reconditioned seal. This seal includes a serial number that ties back to the:

- PEARL Accredited Company
- PEARL Certified Technician that worked on the equipment
- Reconditioning process itself

This traceability ensures transparency and safety.

Why This Matters to You:

The PEARL seal ensures that the piece of electrical equipment has gone through a rigorous remanufacturing/reconditioning process—giving you peace of mind.

- Confidence in Compliance – you know it meets the Code
- Traceability – you can verify the source
- Safety – trusted to perform as expected

The PEARL Seal is your proof — backed by national standards.

Look for the PEARL Seal.
Demand qualified work.
Ensure safer electrical equipment.
